Projects

IMDB CLONE [CODE]

- The developer created comprehensive API's that mimic IMDb's functionalities, including full CRUD (Create, Read, Update, Delete) operations.
- Employing Postman for rigorous API functionality testing and enhancement showcases a commitment to quality assurance.
- The use of a tech stack that includes HTML, CSS, JavaScript, Django-rest for the back-end, for the database, and JWT authentication.

GUPPRO [CODE]

- The creation of "GUPPRO," a platform for personalized sheets with adjustable privacy controls, demonstrates the developer's innovation.
- By incorporating Google authentication, the developer bolstered the platform's security.
- The establishment of a stringent permission structure, granting access to private sheets only to designated email holders, showcases a strong commitment to user privacy.
- Leveraged technologies include HTML, CSS, JavaScript, Django for the back-end, SQLite for the database, and Google authentication.

SEASONAL MART [CODE]

- Orchestrated the creation of "Seasonal Mart," an innovative e-commerce platform that redefined the online shopping experience.
- Implemented a secure authentication system to guarantee safe and smooth user access. The introduction of a user-friendly "Reset Password" option.
- Integrated an intuitive cart feature that facilitates effortless product addition, whether users are logged in.
